Thesis : Disentangling Unemployment. Grade: 5.75/6.
Supervisor: Prof. Martin Huber

RESEARCH

- In progress **The impact of fiscal decentralization on commuting decisions**
With Jeremy Zuchuat
What happens when cities expand and become less administratively fragmented? This research aims at exploring and analyzing how fiscal decentralization coupled with progressive taxation impacts individual commuting decisions.
- Submitted **Are incentive effects from fiscal equalization underestimated? Evidence from a Swiss reform**
Single authored
In this research I propose two refinements to measure the tax-setting incentives created by fiscal equalization schemes. My results show that existing literature may have underestimated the incentive effect of equalization grants.

WORK EXPERIENCE

- 03/2018 - ongoing **IDHEAP**, University of Lausanne, Switzerland.
Teaching and Research Assistant
Fiscal Policy (MA), Economie Publique et Budgets Publics (MA), Construire un bon Mémoire (MA), Gestion Financière du Secteur Public (MPA), Economie Publique (MPA).
